Message

The Atlantic Coast Pipeline is a bad idea. It threatens North Carolina's air quality and water quality, Compressor stations emit harmful pollutants and are dangerous--they can catch fire.

In the bigger picture, more fossil fuel is not the answer to our energy needs. The state should give more encouragement to wind, solar, and other forms of clean energy--they are clearly better for the environment, and clean energy jobs pay well and cannot be outsourced.

Fossil fuel is a dying industry. Please resist and defeat the Atlantic Coast Pipeline.
